

URBAN RESIDENTIALS

2023-25 Impact Summary

534

targeted students attended across 11 residentials

12

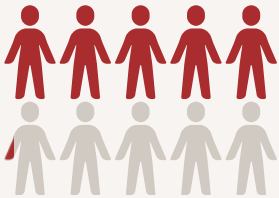

schools across inner-city Derby and Leicester participated

95%

of attendees met at least **one measure of disadvantage**
(64% met two or more)

78% ▲ 20%

of attendees said they were **likely to apply to Oxford in future**
(65% before the residential)

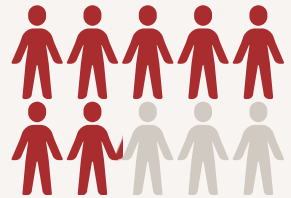

51%

of attendees live in areas of **socioeconomic deprivation**
(Acorn 4 & 5, IMD 1 & 2)

72%

of attendees identified as Black, Asian or another **ethnic minority** group

YEAR 10 ATTENDEES:

88% ▲ 120%

felt well-equipped to **make informed A-level choices** after the residential
(40% before the residential)

YEAR 12 ATTENDEES:

74% ▲ 155%

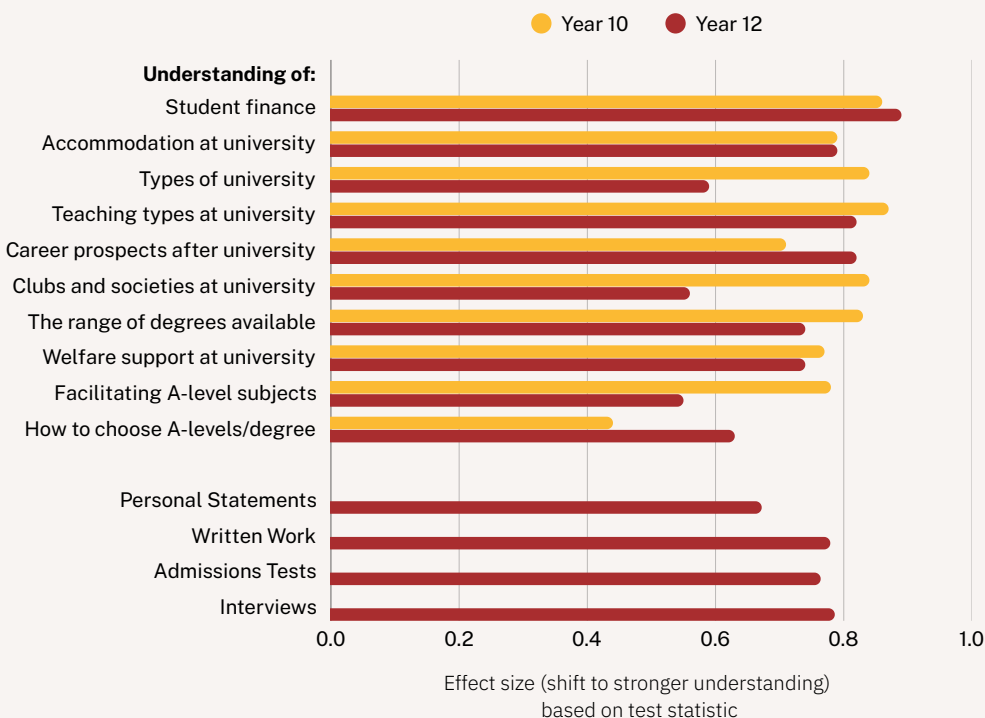

felt well-equipped to **make an application to Oxford** after the residential
(29% before the residential)

This is the best residential and outreach programme I have been involved with across both Oxford and Cambridge, and this is over 20 years. What sets it apart is the practical, detailed help and the experience and warmth of all involved.

**POST-16 EXECUTIVE DIRECTOR,
SPENCER ACADEMIES TRUST**

IMPACT

Quantitative analysis¹ demonstrates a **statistically significant positive impact on all aspects measured** including participants' understanding of university, student finance as well as A-level and degree choice.

¹ Calculated using a Wilcoxon signed-rank test using the matched pre- and post- residential survey responses, which were given as 5- and 10-point scales in response to questions such as "Do you feel well equipped to choose a university course?" and "How much do you know about the following aspects of university?".
